PROFESSIONAL SUMMARY

Computer Science student with experience in full-stack web applications, IoT-based projects, and programming using Java and Python. Familiar with AI/ML concepts, database management, and web technologies, with an interest in building practical and scalable software solutions. Passionate about software engineering,AI based agents and technologies, problem-solving, and learning modern technologies across development and intelligent systems.

EDUCATION

Vellore Institute of Technology,Andhra Pradesh| 2023-2027

Bachelor of Technology - Computer science with specialisation in AI and ML

Relevant Coursework: Data Structures, Software Testing, Web Development, Machine Learning,Next js ,Database Management,Full Stack Development, AI agents development.

WORK EXPERIENCE

Python Programming Intern – CodSoft | 2024

- Assisted in developing Python-based applications and scripts.
- Implemented logic and debugging solutions under mentorship.
- Collaborated using structured coding and version control practices.

Personal Brand Development | 2025–Present

- Built digital brand focused on self-growth and productivity.
- Designed structured content strategies improving audience engagement and digital reach.
- Applied analytics to optimize reach and audience growth.

TECHNICAL SKILLS

- Programming: Python, Java, C/C++
- Web: Flask, HTML, CSS, Bootstrap
- Databases: MySQL, SQLite
- Tools: Git, MQTT, Raspberry Pi, ESP32
- Core Concepts: DSA, OOP, Machine Learning Basics

COURSES

- Generative AI – Internshala Trainings (Jun 2025 – Jul 2025)
- Machine Learning – LaunchedGlobal (Jun 2025 – Aug 2025)
- Python – Internshala Trainings (Feb 2024 – Apr 2024)

PROJECTS

Solar Energy Exchange System (IoT)

The IoT Solar Energy Sharing System is a smart project that monitors and manages solar energy using IoT technology. It detects excess solar power generated in one house and shares it with another house that needs electricity. The system uses sensors, ESP32/Raspberry Pi Pico, and MQTT communication for real-time monitoring and energy transfer. It helps reduce energy wastage and promotes efficient use of renewable energy.

AI-Powered Resume Analyzer

Built an AI-powered resume analysis web application that extracts resume data, evaluates ATS compatibility, matches resumes with job descriptions, and provides intelligent feedback using NLP techniques. Integrated PDF/DOCX parsing, keyword extraction, and skill-matching algorithms with a responsive web interface.

Web-Based Health Record System

Developed a centralized healthcare record management system integrated with Aadhaar-based identification for secure access to patient medical history. Enabled efficient storage, retrieval, and management of healthcare records to improve hospital workflow and emergency treatment response. Focused on data accessibility, authentication, and streamlined patient record handling using web technologies and database integration.
